

a Repeated calculation

Gas-to-water free energy

b Learn once, reuse across molecules

Six sources → six frozen structure-to-response maps

COSMOtherm

continuum water

Abraham

empirical axes

OpenFF + δ

explicit water

GBn2 + δ

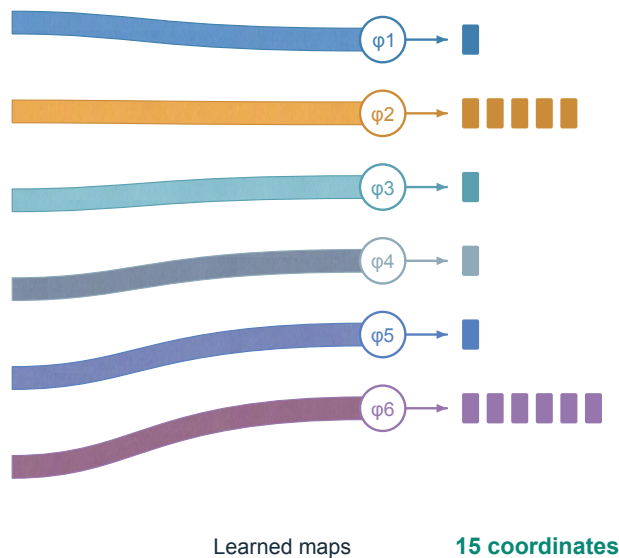

implicit water

SMD(water)

continuum water

ConfSolv

conformer response

δ : learned correction to a physical calculation

c Predict hydration from structure alone

No new solvent calculation at inference
