

a

Source	Source unit	Reference-set relationship	Training outcome
FreeSolv	molecular identities	80 of 85 connectivity matches	provenance audit; not an external test
MolSolv	SMD conformer calculations	82 exact structures + 3 connectivity aliases removed	350,391 structures retained
ConfSolv	H ₂ O conformer records	13 connectivities removed	39,878 connectivities retained

Units are intentionally source-specific; unlike records are not plotted on a common scale.
